REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicants claim a method of producing polysuccinimide polymer comprising: (a) forming an solution of aspartic acid and a water soluble polymerization catalyst in an aqueous medium, further containing a volatile protic acid selected from the group consisting of hydrochloric acid, hydrobromic acid and hydroiodic acid, (b) drying the solution to give a solid residue; and c) heating the residue at a temperature and for an amount of time sufficient to produce a polysuccinimide polymer. The novel feature of this process reside in the formation of a solid residue which is a mixture of aspartic acid and polymerization catalyst which upon heating results in a high molecular weight polysuccinimide polymer e.g., up to 200,000. Such is neither taught nor anticipated by the prior art of record, which teaches the formation of polysuccinimide polymer of much lower molecular weight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
